

HIGHWAYMAN WHO KILLED TRAINMAN MEETS HIS DOOM

One of the Desperados Who Held Up Great Northern Express Near Bellingham When Four Persons Were Slain, Gives Battle to Detective and Sheriff, But Loses Fight.

Aberdeen, South Dakota, April 14.—Harry Mathews, one of the three bandits who held up the Great Northern express near Bellingham, Wash., last month, killing an express messenger, was in turn shot and killed last night at Lemmon, S. D., by George Schlong, special railroad detective, and deputy Sheriff Astell of Perkins county.

There has been a reward of \$10,000 on Mathews' head, since March 22. Mathews boarded a Milwaukee freight train at Downan, N. D. last night.

After an attempt by the train crew to throw him off, he pulled a gun and the crew let him alone, but wired George Schlong who was at Lemmon to meet the train upon its arrival at that station.

When the train pulled into Lemmon, Schlong and Astell were on hand. Mathews was found in a box car. When officers opened the door of the car, the bandit opened fire on them. One bullet struck Deputy Sheriff Astell in the shoulder, while the other bullet struck Schlong over the heart.

A bundle of papers in Schlong's inside coat pocket, deflected the bullet, and saved his life, but caused a bullet wound on the breast. Another bullet pierced his sleeve but did not injure him.

The officers again fired immediately killing Mathews instantly.

Mathews has been searched for all over the west since he and two com-

RAPID PROGRESS ON SEWERS BEING LAID TO NEW INDUSTRIES

Work has started on the construction of the sewer to serve the tannery, steel works and other industries that are situated at Manchester, immediately south of the southern limits of the city. These firms will extend the sewer from the city limits to their industries as soon as possible.

Commissioner Saunders states that up to the present there have been some 2,000 feet completed, and work is being rushed to completion before the frost gets out of the ground, and the sloughs become filled with water, when it will be practically impossible to work.

Bellboy Robs Princess.

Roma, April 14.—Nicol Verzaca, a hotel boy in the Grand Hotel, was confessed to stealing \$4,000 worth of jewels from Princess Dorothy Radwiliw. The jewels were found under a bathtub in the princess' apartment.

Contracted A Severe
Cold After An Operation.

DR. WOOD'S NORWAY PINE
SYRUP
Effected A Complete Cure.

Mrs. Thos. A. Julian, Almonte, Ont., writes: "Just a few lines to let you know how thankful I am for what Dr. Wood's Norway Pine Syrup has done for me. A few years ago I was operated on for appendicitis, and was confined to the hospital for five weeks. When I returned home I contracted a severe cold which left me with a bad cough. A neighbor told my husband about Dr. Wood's Norway Pine Syrup so I decided to try a bottle. When it was finished it had done me so much good I took another which completely cured me. I can very strongly recommend it."

Dr. Wood's Norway Pine Syrup contains all the lung healing virtues of the famous Norway pine tree, which makes it the very best preparation for Coughs, Colds, Bronchitis, and all Throat and Lung troubles.

Price, 25 and 50 cents.

See you get "Dr. Wood's" as there are many imitations on the market. The genuine is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

ASK FOR Gaelic OLD SMUGGLER SCOTCH AND INSIST ON GETTING IT!

War Cries of the Clans

Lock Slogh" (Gaelic)
"The Lock of the Host" (English)

Whether the host keeps it under lock or not he'll find Gaelic Old Smuggler the fastest disappearing Scotch he ever had.

"TIZ" FIXED MY SORE, TIRED FEET

"O, Girls," Don't have puffed-up, burning, sweaty feet or corns.

"TIZ" makes my feet just dance."

Ah! what relief. No more tired feet; no more burning feet; no more itchy, smarting, sweaty feet. No more pain in corns, calluses or bunions. No matter what ails your feet or what under the nails, you're tried without getting relief, just use "TIZ."

"TIZ" is the only remedy that draws out all the poisonous exudations which puff up the feet; "TIZ" is magical; "TIZ" is grand; "TIZ" will cure your foot troubles as you never learn to draw up your face in pain. Your shoes won't seem tight and your feet will never, never hurt or get red, swollen or tired. Think of it, no more foot misery; no more burning corns; calluses or bunions.

Get a 25-cent box at any drug store or department store, and get instant relief. Get a whole year's foot relief for only 25 cents. Think of it.

BURGULARS MAKE GETAWAY WITH NUMBER OF GUNS

Police Strongly Suspect Work
That of South Side
Desperadoes.

McGILL-DRISCOLL STORE
ENTERED; LOSS ABOUT \$175
Many Valuables Around But
Everything Left Alone Except Revolvers.

A burglary which has given rise to some grave fears was committed early Monday morning, when a gang of grocers stole a number of guns from the McGill-Driscoll store, entered and as well as \$175 in cash.

Entrance was gained by the back door, the burglars cutting a hole in the glass part of the door large enough to allow a man's hand to be put through, the bolt was then drawn. The door was further secured with a stout iron bar which was fastened at the end by a padlock. This was broken open with a large iron railroad spike which was found on the floor of the shop.

The peculiar part is the fact that although there were a large assortment of goods to choose from, goods of a modern make which could be turned into money far easier than the revolvers that were stolen, nothing but guns were taken. Three men were noticed late that night hanging around the back of the store and this led the police to think that those responsible and the gunmen who were engaged in a fight with Constable Morgan on the south side recently, are the same. This belief is strengthened by the fact that a couple of revolvers were found by the police on the south side after the shooting affair last Thursday morning.

On account of the new law which requires that everyone who purchases firearms must have a license, it would be very difficult for the burglars to be one and the same crowd as the south side gunmen.

The police absolutely refused to discuss the matter and no further light can be thrown on the burglary from that source.

TEMPERATURE OF SICK
GIRL SO HIGH BREAKS
THERMOMETER IN USE

Kiev, Russia, April 14.—A temperature which amazed the doctor and broke the thermometer, is recorded in the case of a girl patient in one of the Kiev hospitals.

She is suffering from typhus fever and her case attracted special attention when a temperature of 112 Fahrenheit was recorded, burning the thermometer.

In the presence of a number of professors and students, the temperature was taken with a special instrument which showed 122 degrees, later rising to 131 degrees.

The facts are vouched for by the eminent professors Obraztsov and Janovskiy. According to all the previous experience life at such a temperature is unknown, even impossible.

FOUR WINTERS OF RHEUMATISM

Cured of Sciatica And Muscular Rheumatism By "Fruit-Lives"

Rosemont, Ont., May 2nd, 1913. "Fruit-Lives" cured me of Rheumatism. It was the only medicine that made any impression on me. I was a terrible sufferer from Rheumatism. I was laid up for four winters with Sciatica and Muscular Rheumatism, and was completely crippled.

Some neighbor of mine told me that "Fruit-Lives" helped him, and I started to take them. I used "Fruit-Lives" faithfully for two years, taking them every day as I saw they were doing me good, and the results were marvelous.

For over two years, I have been completely free from my Rheumatic Pains whatever I give "Fruit-Lives" the credit. W. H. KACHIR, 500a Box 6, for \$2.50, per trial size, At all dealers in Fruit-Lives medicine, Ottawa.

OPTIMISM WITH A VENGEANCE! SAYS MONEY STRINGENCY HELPED

That money stringency in any country does not necessarily mean a setback, is the opinion of Frederick C. Armour of London, England, who has been in the city a few days on his way to Victoria, B.C., and who relates the instance of Canada last year when applying for large loans and money from the money markets of the old country.

Mr. Armour believes that the money stringency in Canada, and especially western Canada did more to advertise the country and the large cities which applied for loans than anything else could have done. It gave the financiers of England the impression, and rightly so, that the cities of western Canada are progressive and enterprising and anxious to get along, and understood that was the reason for their asking for money assistance.

Mr. Armour has visited most of the larger cities on this trip through the west and says it is his belief that Edmonton is behind none and far ahead of most of the cities he visited in Canada, in the matter of progressiveness, and stated that building operations and general retail and merchandising businesses in Edmonton compared most favorably with any city of the west.

Already a number of Canadian cities were applying for loans for this year, and those, according to Mr. Armour are being received and considered most favorably.

Entrance was gained by the back door, the burglars cutting a hole in the glass part of the door large enough to allow a man's hand to be put through, the bolt was then drawn. The door was further secured with a stout iron bar which was fastened at the end by a padlock. This was broken open with a large iron railroad spike which was found on the floor of the shop.

The peculiar part is the fact that although there were a large assortment of goods to choose from, goods of a modern make which could be turned into money far easier than the revolvers that were stolen, nothing but guns were taken. Three men were noticed late that night hanging around the back of the store and this led the police to think that those responsible and the gunmen who were engaged in a fight with Constable Morgan on the south side recently, are the same. This belief is strengthened by the fact that a couple of revolvers were found by the police on the south side after the shooting affair last Thursday morning.

On account of the new law which requires that everyone who purchases firearms must have a license, it would be very difficult for the burglars to be one and the same crowd as the south side gunmen.

Crash of Temporary Structure Falling Warns Engineer on Train and Calamity is Averted—Gap Caused in Newly Linked Transcontinental—Little Delay State Local Officials.

(Special to the Capital)

Prince George, B.C., April 14.—With a crash that could be heard all over the neighborhood here, the G.T.P. bridge spanning the Fraser river was swept away early this morning by the high waters caused by the breaking up of the river and the melting of the snow in the mountains, and as a result there is now a gap on the line and

traffic between this city and Prince George will be held up for several days.

Just as the crash was heard a freight train was passing the bridge and was stopped on its way to Edmonton. Had it pulled out five minutes sooner there would have been a terrible accident. As it is, the accident, while it will cause serious inconvenience, will not be a tragedy. The bridge was only a temporary structure and was to have been replaced this season.

Although the Fraser river now is in flood and the snow in the mountains will not be cleared for many weeks, it is not thought that the water will rise any higher. The general feeling is that the flood was rather caused by the unusually warm weather that has been experienced through all the Fraser valley for the past two weeks.

FARMERS ALREADY WORKING ON LAND AROUND GROUND

O. R. Price, Says Possibilities of Country to North Are Unlimited.

PREDICTS CONTINUED
RAPID GROWTH HERE

Magnet of Peace River Draws Still Another Easterner to Fertile Plains.

Another easterner has become enthusiastic over Canada's last great unoccupied area, and is ready every hour to return to the north and west of Edmonton to the Peace River country. O. R. Price, of Toronto, Ontario, spent a few hours in the city before departing for his home in the east, from where he intends to move his family and come to Ground.

Mr. Price's trip through the north country took him to nearly every town of importance, but in his opinion Ground is due to become one of the best of the larger towns in the country, and more especially if the railroad touches it, he believes it then would become the one big town of the north country.

"With the springing up of many small towns in the north, Edmonton must necessarily become a great and large city," said Mr. Price yesterday. "Persons going north will have to pass through here, and in that way the city will become advertised to a greater extent than before, and it will tend to draw other people in this direction."

Mr. Price spent about two months in and around the Ground district, and claims that it is more of a climate, it is milder there than in Edmonton, and says that already farmers are busy in their fields, breaking up the land, seeding, and that the opportunity for the farmer in the north country are wonderful. It is his realization of this fact that has decided him to move from east to west.

St. Thomas, April 14.—C. J. Crank, his wife and a baby probably still in the hospital, were found this morning at a pet. Early this morning the family was awakened by the alarm of a fire. It was the first time the family was awakened by the alarm of a fire. It was the first time the family was awakened by the alarm of a fire.

The fire started in the basement, near a waste paper chute, and the chute was rapidly up through this chute and was rapidly up through this chute and was rapidly up through this chute.

Thaw Petition Granted
Concord, Conn., April 14.—Harry Kendall Thaw's petition for a writ of habeas corpus was granted by Judge Edgar Aldrich of the United States district court today.

The court said, however, that no order would be issued for the prisoner's discharge from custody until arrangements had been completed to take the case to the United States supreme court on appeal.

From Jail to Death
Calgary, April 14.—Siddie Dunsmuir, just released from jail, while intoxicated fell into the C.P.R. Irrigation canal today, and was drowned.

ZAM-BUK SAVED MY ARM

So says Mr. John Evans, of 87 Lawrence St., Halifax, N.S. He had blood poison in his finger. A doctor attended him for three months, but the finger got worse; and a second doctor was called in. Finally the finger was cut off! But the mischief didn't end there. Another operation was performed, and the bones in the palm of his hand scraped. Still no relief, and the hand would not heal. The poison had got into the blood vessels of the arm, and the doctor said the arm must come off, too!

Then, after undergoing all this agony, Mr. Evans was advised to try Zam-Buk—a course he should have taken right at the start. He says: "The Zam-Buk quickly reduced the jumps which had formed on my arm and eased the pain. It was doing so much good that I told the doctor I would use nothing else. Day by day I applied it freely, both to the terrible sore in my hand and to my arm, and it drew the poison out marvelously. To cut a long story short, by the time I had used seven boxes of Zam-Buk my hand was healed, my arm was free from inflammation or pain, and every trace of blood-poisoning had been banished. Zam-Buk saved my arm."

THE LESSON IS THIS—The Zam-Buk right at the start for cuts, blood-poisoning, ulcers, abscesses, piles, venous ulcers, eczema, eruptions, scalds, burns, bruises, and all skin diseases. Don't wait until you're in a dire condition!

Cut out this article, send it with 10c stamp (no return postage) to Zam-Buk Co., Toronto, with name of this paper, and we will send you sample!

Panama and the Canal

This beautiful big volume is written by Willis J. Abbot, a writer of international renown, and is the acknowledged standard reference work of the great Canal Zone. It is a splendid large book of almost 500 pages, 9x12 inches in size, printed from new type, large and clear, on special paper, bound in tropical red vellum cloth; title stamped in gold, with inlaid color panel; contains more than 600 magnificent illustrations, including beautiful pages reproduced from water color studies in colorings that far surpass any work of similar character. Call and see this beautiful book that would sell for \$4 under usual conditions, but which is presented to our readers for SIX of the above Certificates of consecutive dates, and only the \$1.20

(Sent by Mail, Postage Paid, for \$1.60 and 6 Certificates)

Panama and the Canal

Regular Octavo size; text matter practically the same as the \$4 volume; bound in blue velvet cloth; contains only 100 photographic reproductions, and the color plates are omitted. This book would sell at \$2 under usual conditions, but is presented to our readers for SIX of the above Certificates of consecutive dates, and only the \$2.00

(Sent by Mail, Postage Paid, for 70 Cents and 6 Certificates)

HON. C. R. BOYLE MAKES PLEA FOR BETTER EDUCATION OF THE CHILDREN OF ALBERTA

Provincial Minister, Delivers Inspiring Address at Lethbridge Before Teachers of Province—Points Out Necessity For Better System of Technical Training.

Lethbridge, Alberta, April 14.—There was a large attendance at the meeting of the Alberta Educational Association held this morning. The feature of the proceedings was an address by Mr. C. R. Boyle, minister of education who in part spoke as follows:

"I am going to discuss with you this morning a few of what I consider to be the most important educational problems of this province. The hope that in their solution the department of education will have the co-operation, sympathy and support of the teaching profession."

"The question of vocational education which is attracting the interest of educators in the world over is one to which we have only commenced to solve here and one which I think in the next few years will be our greatest educational problem. Closely related to vocational education is, in my opinion, the problem of keeping our pupils at school longer period in our schools. We are commencing to measure educational results to a great extent by the number of the extent to which it fits the pupil to earn a livelihood, or in other words, to be self-supporting. I need not tell you, the teachers of this province, what a small fraction of our school population remain in school after the age of 14."

WELL-EQUIPPED HEAD-FACTORY MANUAL TRAINING COURSE

To Cure Sniffles and Clear Stuffed Nostrils Nothing Equals "Catarrh-o-ze."

You can end a cold mitchy quicker—It completely—By Catarrh-o-ze. It cures Catarrh, whether in nose, throat or bronchial tubes. It can be given to your children in school for a much longer period than they do think of. It is the only remedy that encourages parents to think of the period of the education of their children. I have no doubt whatever that the principle reason why children leave school at such an early age is that their parents are so concerned about their children's health that they are unable to see any early benefit accruing from the continuation of their education. We can, however, convince either the pupils themselves or the parents of this fact.

No Immediate Results. "There are not always results in any event immediate results. The case however is quite different when we consider the undertaking of vocational training. Both parent and the pupils are able to see at once that the pupils are acquiring something concrete that will be of practical value to him throughout life. I am confident therefore that we can introduce a really valuable amount of vocational education towards the end of the public school training. We can, however, increase the percentage of students who will continue in our schools improving themselves by way of vocational education and acquiring as well a higher academic standing."

"There is to a very great extent an agricultural country the rural school problem is entitled to first consideration. The government has endeavored to solve the question of vocational training for the sons and daughters of farmers by the establishment of vocational agricultural schools upon the various demonstration farms. These schools conducted by the department of agriculture have made commendable this year and have met with success. It will be the policy of the government to continue to establish more of such schools as rapidly as funds are available. I might say that money for operating the schools of agriculture comes from the federal government. It is part of a grant which was made by the federal government to the provinces in aid of agricultural education. A few years ago the Dominion government appointed a commission on technical education to inquire into the question and report. That commission, the chairman of which is Dr. Robertson, who will address you today, has reported and recommends that the federal government make a grant to the provinces in aid of technical education."

Solution of Problem. Of course, if this recommendation is accepted by the Dominion government, it would do much to accelerate the solution of the problem of vocational education. Three agricultural schools have been established this year at Claresholm, Oids and Vermilion respectively, and I would advise the teachers of the country to take the first opportunity to visit one of these schools as you will be able to learn upon inspection the great advantages these schools have much better than I could tell you in the course of an address. This much I will say however that these schools combine the idea of a technical education as well as that of scientific training in the business of agriculture. The schools are equipped with a science laboratory, a dairy stock judging room, carpenter shop and a blacksmith shop as well as a complete domestic science equipment, and I have not the slightest doubt that the boys turned out of these schools will go upon the land with a very complete and practical knowledge of the business of farming and the girls who are trained there will have the training which will admirably fit them for farmers' wives."

Now then we have to consider the question of laying a foundation in the rural schools for the most advanced vocational education, which will be given to the children of the country. The eighth grade to say nothing of the ninth and beyond, is almost unknown and where the great majority of the parents could afford to leave their children in school for a much longer period than they do think of. It is the only remedy that encourages parents to think of the period of the education of their children. I have no doubt whatever that the principle reason why children leave school at such an early age is that their parents are so concerned about their children's health that they are unable to see any early benefit accruing from the continuation of their education. We can, however, convince either the pupils themselves or the parents of this fact.

Legislature Gives Aid. The legislature has provided in the last session for a grant in aid of teaching agriculture in the public schools, and this grant will be distributed to the provinces in proportion to the number of teachers and the number of pupils. I think that this is a very commendable action on the part of the legislature and I am sure that the school boards and the teacher possessing the qualifications to teach the subject will make the most of it.

Another question which the department must have put on its mind is the question of compulsory education. As you are well aware, the law now in force in this province makes it compulsory for all children between the ages of six and fourteen to attend school. This law is enforced by the department and the law in rural parts being left with the department. The department is now trying to get the teachers and our departmental inspectors for the purpose of carrying out the law in rural parts. We are getting reports from the teachers every three months we are getting the information which will enable us to get the law enforced. It has always occurred to me that in the rural parts of the country any way we could have a law if the people who are paying school taxes were to realize that they are required to pay, whether they have any children or not, that it does not cost any more to conduct a rural school than half the children present than those who are not present, and that when the children are present, they pay the taxes for the purpose of education of the children of their neighbors. I think that the state receives value for the money it spends in the rural schools. I think that the state receives value for the money it spends in the rural schools.

Encourage Technical Education. As to vocational training in our towns and cities the legislature at the last session also voted money to encourage technical education. Dr. Miller has been appointed director of technical education and when he has fully completed his investigation of the conditions in this province, he will report to the legislature. The money will be settled by the department. In the meantime, however, a very nice start has been made by the technical education by our larger cities. Most of them now have their technical schools, and all of them have their training and domestic science equipment and instruction in their public schools. I think that we can do better yet to employ specialists to teach this subject. There is no good reason why we cannot have a specialist to teach the subject and many of our own citizens are growing from our high schools in the cities and are going into teaching profession have a very good training in domestic science, and many of our boys have had a very satisfactory manual training course.

Chances for Promotion. Commence chairman of this morning that with regard to promotions in the street railway department, he was of the opinion that they should be carried out on the basis of merit. The employees had been in the service and the merit and record of the employees. He added that the outside help was obtained the men at present would be considered and given the first chance for promotion.

Catarrh-o-ze promptly opens up clogged nostrils, taking that irritating pain out of the nose, prevents the formation of pus, and thus prevents there is a nasty discharge that disappears with a few hours' use of Catarrh-o-ze. If a bad cold, or a severe sneezing, if you have dull frontal pains over the eyes—you'll get the quickest cure possible with Catarrh-o-ze.

Years of wonderful success in Europe and America have proven Catarrh-o-ze a specific for all catarrhal, throat, bronchial and breathing-organ troubles. It cures colds, croup, whooping cough, and all other ailments of the throat. Use the tried and proven remedy. Any dealer anywhere can supply Catarrh-o-ze. It is a complete outfit, \$1.00; small size 50c; trial size 25c.

factory manual training course we are now commencing to get into the profession teachers who are qualified to teach this work as well as take one of the grades.

Well Equipped to Teach. We are also getting into this province from the old and new countries young men who have had a technical training over there in advance of the ordinary manual training course. They are well equipped to teach manual training in a town or village school as well as in a vocational school as well as in a vocational school. It appears to me that it is the duty of the government to make it possible for the young men and women of the villages, towns and cities with vocational education as complete as possible, as well as those upon the farms. It may not be possible to teach completely a trade to every boy in a village or town but I think that it should be quite possible to give him a sufficient mechanical training at least to enable him to take up a trade or to be able to do a good job of the learning of a trade. The solution to a great extent depends upon the way in which the money is being spent. If we are going to get the desired results. At the present time this province is paying out of the provincial treasury a much larger sum of money than any other province of Canada, and I think that it is all round worth getting a good value for our money in educational results.

Teachers Should Assist. I think that the province is spending out of the public treasury as large a proportion of the cost of education as it can be expected to be able to finance, and it is going to rest upon the public, therefore to get into their own pockets. The increased efficiency which I think we should have in our public schools. The province is spending a large sum of money in the work in which every teacher in the province can assist. I do not know of any class of men or women who have as large an influence upon the public opinion as the teaching profession, and particularly upon the school boards. I think that it cannot be denied that we have drawn from the best of the province and elsewhere a type of teacher that is considerably above the average in ability and consequently above the average in influence, and I would like to leave this suggestion with you that your influence should be used to encourage the public to expend the money to give vocational education for the benefit of the province and a higher standard of education for all the boys and girls of the province.

Will Have Difficulty. Another question which the department must have put on its mind is the question of compulsory education. As you are well aware, the law now in force in this province makes it compulsory for all children between the ages of six and fourteen to attend school. This law is enforced by the department and the law in rural parts being left with the department. The department is now trying to get the teachers and our departmental inspectors for the purpose of carrying out the law in rural parts. We are getting reports from the teachers every three months we are getting the information which will enable us to get the law enforced. It has always occurred to me that in the rural parts of the country any way we could have a law if the people who are paying school taxes were to realize that they are required to pay, whether they have any children or not, that it does not cost any more to conduct a rural school than half the children present than those who are not present, and that when the children are present, they pay the taxes for the purpose of education of the children of their neighbors. I think that the state receives value for the money it spends in the rural schools. I think that the state receives value for the money it spends in the rural schools.

Encourage Technical Education. As to vocational training in our towns and cities the legislature at the last session also voted money to encourage technical education. Dr. Miller has been appointed director of technical education and when he has fully completed his investigation of the conditions in this province, he will report to the legislature. The money will be settled by the department. In the meantime, however, a very nice start has been made by the technical education by our larger cities. Most of them now have their technical schools, and all of them have their training and domestic science equipment and instruction in their public schools. I think that we can do better yet to employ specialists to teach this subject. There is no good reason why we cannot have a specialist to teach the subject and many of our own citizens are growing from our high schools in the cities and are going into teaching profession have a very good training in domestic science, and many of our boys have had a very satisfactory manual training course.

Chances for Promotion. Commence chairman of this morning that with regard to promotions in the street railway department, he was of the opinion that they should be carried out on the basis of merit. The employees had been in the service and the merit and record of the employees. He added that the outside help was obtained the men at present would be considered and given the first chance for promotion.

You Can't Do Without a Balmacaan

THEY are the style "hit of the season"—free and easy, loose and loungy. Smart as any the style world has shown. From a moderate popularity last Fall to a sweeping demand this Spring is their history—and we knew it would happen so we are ready with exclusive styles in rough mixtures and tweeds, cravenette fabrics for all weather, the new waffle cloth and honeycomb cloths in all shades. Prices as low as \$15.00 up to \$40.00 for imported high-class fabrics.

Wet Weather Propositions

On selecting a raincoat it is always wise to know that your garment is as its name implies. Our raincoats are all as we state. They are made in single and double textures, raglan and Chesterfield styles, seams are all stitched and rubber-filled, giving each garment an extra strong lasting quality. They are close fitting at neck and have storm strap on cuffs. Prices \$7.50, \$10.00, \$12.50 and \$15

A very handy coat for the person who travels in an extra light weight waterproof coat, made in single texture, silk lined, collar, cuffs, and fitting neck, all buttons sewn doubly strong. Coat easily packed in your grip. Price \$15

We cannot talk too much on our imported English "Gladstone" Waterproof Coat. Made in an all-wool checked lining, slit pocket to unbutton inside, a handy coat in a rainy day. Balaclava style, it is the most possible. Only Price \$22.50

—Men's Section, Main Floor.

The Hudson's Bay Company

GOOD SWIMMING TALENT AMONG THE Y. M. C. A. BOYS

The first of the holiday activities provided for school boys by the boys' division of the Y.M.C.A. proved very successful. Some 25 "fish" were on the job and sported themselves in the cooling waters. While most of the boys were just swimmers there were a few who give promise of swimming for Edmonton all swimming championships in the near future. The following boys succeeded in swimming up to standard in five different styles—38 pounds a year under: H. Dyer, O. Bentley, C. Bentley, H. Charlesworth. Under 55 pounds: C. Smith. Several boys were successful in part of the test but failed to make standard on some of the more difficult strokes.

The program for Wednesday and Thursday mornings includes running and jumping, and will be open to all school boys. As a boy does not have to beat another boy, but merely come up to the standard, the program should be a success. The school taking the greatest number of boys in proportion to its enrollment will receive the Ash Brothers cup for one year.

Temperance Campaign Sunday

The Alberta temperance and moral reform league campaigns holding a temperance campaign Sunday in the city of Edmonton. The ministerial association at its last meeting endorsed the plan and arrangements for the day. The ministers of the city are all asked to preach on temperance, making special reference to the province wide prohibition campaign which on that day will be formally launched.

The three members of the league will be in Edmonton for the Sunday and will speak in all pulpits open to them.

It is expected to have, for three days, a public exhibition in behalf of temperance. It will be held at the corner of 10th and 11th streets, on which occasion will be shown models, charts, diagrams, etc., of all latest fact and information in the state of temperance.

Coleman Goes to Calgary

Superintendent D. C. Coleman of the Canadian Pacific Railway was in town yesterday for a few days. He has interests here. Mr. Coleman left last night for Calgary on his private car "Lilloet."

FAT LESS MEAT IF BACK BOTHERS

Take a glass of Salts to flush kidneys if bladder bothers you.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well known authority. Because the uric acid in meat excites the kidneys, they become overworked; the blood is impure and there is a sort of distress, particularly backache and misery in the kidney region; rheumatism, neuralgia, and other ailments, stomach, constipation, torpid liver, sleeplessness, bladder and urinary troubles result.

IF BACK BOTHERS

Take a glass of Salts to flush kidneys if bladder bothers you.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well known authority. Because the uric acid in meat excites the kidneys, they become overworked; the blood is impure and there is a sort of distress, particularly backache and misery in the kidney region; rheumatism, neuralgia, and other ailments, stomach, constipation, torpid liver, sleeplessness, bladder and urinary troubles result.

The moment your back hurts or throbs, don't act right off or bladder trouble will be the result. A glass of Jad Salts from any good pharmacy, take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys will then act right. This famous salt is made from the acid of the human urine, combined with lithia, and has been used for generations to flush clogged kidneys and neutralize the uric acid in the urine so it no longer irritates, thus ending bladder trouble.

Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink, which is enjoyed by men and women take and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

SAVES MONEY BEING FREELY OBTAINED

Representative of British Syndicate Looking for Industrial Chances.

Declaring that investments are ruled by fashion, like so many other things in life, J. W. Fowery, of London, England, a member of the British financial syndicate with large investments in the Fraser River Valley and who has been looking for industrial opportunities in the Fraser River Valley, has just returned to Prince George stating that the new law west that is now being opened up in the Fraser River Valley is a most favorable one for the British financial syndicate, and money is being obtained freely for investment in the Fraser River Valley.

Mr. Fowery, seen at the Royal George hotel, stated that his company is looking for industrial opportunities rather than real estate investments. "There is a great deal of building going on in Port George and Prince George," he states, but not much in South Port George.

There is now a good deal of speculation as to the route which will be followed by the Pacific Great Eastern railway, which is to be built into Prince George, and on to the Peace River country, and which has a guarantee of the federal government. Mr. Fowery thinks that the line will go on the east side of the river, though there is considerable opposition in the west side in anticipation that it may go there. A good deal of Scotch capital is being invested in Prince George. He looks for a big city at this point and thinks that Edmonton has a good chance to secure the trade of this territory. It will be years before Prince Rupert can supply the needs of the territory. The Fraser River Valley, and Vancouver will be at a considerable disadvantage owing to the high freight rate.

SIR WILLIAM WHYTE DIES AS RESULT OF ACCIDENT IN SOUTH

Los Angeles, Calif., April 14.—Sir William Whyte, who met with an accident here, died today at 3 o'clock.

Sir William Whyte was a prominent westerner. For three years he was vice-president of the Fraser and North Pacific coast railway, and he held office in many other companies. He was born in Scotland in 1854 and came to this country in 1882. He started as clerk in a C.P.R. office and worked his way up to the position of vice-president. He was appointed vice-president in 1910. For many years he lived in Victoria, where he was regarded as one of the most interesting figures in the city. He was well known all over the world as a business man as well as in England.

To Install Railway Gates

The General Railway Signal Company, Ltd., of London, England, is in Edmonton for the purpose of installing railway gates for the protection of the public and street railway on First Street, Vancouver, and on Alberta avenue, where the Edmonton trunk Pacific and Canadian Northern railways. These gates will be operated by a hand lever and a man will be placed at each gate for the operation of the same. The street cars will be protected by a de-rail about 100 feet from the railway crossings. The gates will be installed at a similar place in the city of Calgary and will be there for some time.

Preparing for Convention

Calgary, Alta., April 14.—Preparations are under way for the accommodation of the delegates to the convention of the Brotherhood of Locomotive Engineers and Firemen to be held here early in August.

SITUATION AGAIN BECOMES TENSE IN REGARD TO MEXICO

(Continued.)

open to conviction if he can be shown that Mexican honor will not be tarnished by rendering them aid. Naval officers are insistent that Admiral Mayo should be fully sustained in his refusal to furnish arms and ammunition of sufficient time for the Mexican officials to fairly consider the proposition.

This view was also shared by some members of the cabinet when the subject was laid before them last night. Meanwhile the big naval transport Hancock, due to have sailed from New Orleans yesterday, is being held at Tampico, is being held. Nine hundred marines are now ashore at the naval station at New Orleans.

Trustee Barnes to Speak

The first public meeting of the public school patrons, and the social evening of the Edmonton School Board will be held at 8 p.m. tomorrow at the Hutterford School, Bonnie Dundee, south side. The meeting will be addressed by School Trustee S. A. Gordon Barnes and others. All are invited.

Calgary Horse Show On

Calgary, April 14.—With the judging of horses, the Calgary horse show opened this morning. The features of the day's program will be the performance of the Sifton String of jumpers is responsible for heavy seat work.

A Good Attendance Marked the Morning's Proceedings

Mrs. Bridget Hurley is dead at 103 in Columbus, O.

IF BOWELS AND BLADDER BOTHER

Take Salts to Flush Kidneys and neutralize irritating Acids.

Kidney and bladder weakness result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it out in the urine, where it often remains to irritate and inflame, causing a burning, scalding sensation when uric acid is excreted. As the acid builds up in the system, the neck of the bladder, thence, it gives relief two or three times during the day, the urine so it no longer is a scalding, the water passes sometimes with a scalding sensation and is very profuse. It is then difficult in avoiding it.

Bladder weakness, most folks call it, because they feel a constant irritation. While it is extremely annoying and sometimes very painful, this is really one of the easiest ailments to cure and overcome. Get about four ounces of Jad Salts from your pharmacist, and take a tablespoonful in a glass of water before breakfast, continue this for two or three days. This will neutralize the acids in the urine so it no longer is a scalding, the water passes sometimes with a scalding sensation and is very profuse. It is then difficult in avoiding it.

Jad Salts is inexpensive, harmless, and is made from the acid of grapes and lemon juice, combined with lithia. It is used by thousands of folks who are subject to urinary disorders caused by uric acid crystals in the urine. It is a splendid for kidneys and causes no bad effects whatever.

Here is what a pleasant, efficient lithia-water drink, which quickly relieves bladder trouble.

COAL OUTPUT IN ALBERTA SHOWS BIG INCREASE

During Past Eight Months 500 Per Cent. More Mined Than Previous Year.

EDMONTON DISTRICT HAS LARGEST CANADIAN AREAS

Mine Rescue Stations Being Established at All Important Centers.

Rapid development of the coal industry of Alberta is shown by figures which have just been compiled regarding the operations of coal mines in the province in 1913. Total production in Alberta during 1913 numbered 4,366,246, being an increase of 569,957 over 1912. During the past eight months the coal output for Alberta has increased 500 per cent.

The Edmonton district has the largest coal fields, not only in Alberta, but in the Dominion. These areas are being opened up as fast as railway construction and capital make their operation possible. At the present time the Crow's Nest holds first place in the coal producing districts in Alberta, having an output of 1,849,435 tons. Lethbridge comes next with 1,242,229 tons; Edmonton third with 842,430 tons and Calgary fourth with 627,661 tons. A large number of new mines were opened up during the year, mostly in the Edmonton coal field. Some of these were closed down again, on account of the fact that at the present time they are not served by railways.

8,000 Men Employed.
An increased number of men found employment in the mines of the province during 1913, the total number of men employed in the mines, both above and below ground being given as 8,008. Machinery is coming to be used more and more in getting out the coal. In the lignite field more than half the coal is mined by machinery, but in the bituminous or anthracite fields, twenty-nine mines are using electricity. Explosives have been installed in the larger mines and are proving of great service, both in assisting the management of the mines and in obtaining assistance when accidents occur.

Mine rescue stations have been established, two in the Lethbridge district and the other between Coleman and Burnham. Others will be established shortly in the northern part of the province. The stations are equipped with up-to-date apparatus and complete appliances for rescuing miners who are injured. The miners are taking up first aid work very readily, 217 having presented themselves for training during the year and 51 been granted certificates for proficiency.

There were 28 fatal accidents in mines in the province during 1913. Most of these occurred in the smaller mines where the managers are not required to hold first class certificates and are not so conversant with the mine act.

Remains Shipped East.

The remains of Miss Stanley Burrow who died on Good Friday, were shipped to the east last night. The late Mr. Burrow was for some time previous to the last illness been engaged as traveling salesman for the Great Western company. He is survived by his mother, Mrs. Ellen Burrow of Edmonton, a sister, Mrs. L. E. Burrow of this city, and a brother, Percy Burrow of this city, and a brother, Percy Burrow of this city, and a brother, Percy Burrow of this city.

Leather Workers' Win.

Ontario, April 14.—Workmen have been victorious by a 4-2 vote in the recent election of the Dominion Trades and Labor Congress, that the dispute between the leather workers and the employers and the leather workers, which has been in progress since the 1st of March, has been settled.

Death Cause Suicide.

Tokio, April 14.—Tokio Tajima, a wealthy farmer who was formerly attached to the dowager empress's palace, dressed in white robes, fasted a week and prayed in the temple on Mount Ashiyama for the recovery of the dowager. On descending from the mountain he learned that the dowager was dead, and committed suicide.

TRY THIS STOMACH REMEDY AT OUR RISK

You know, your home-draught, and when we give you the opportunity to try a remedy with the understanding that if it doesn't relieve you, we will satisfy you in every way we will give back your money, there is certainly no excuse for hesitation on your part. This is the way we always sell Bessal Dyspepsia Tablets. We know what they are made of. We know they have benefited your neighbors and friends. We honestly believe them to be the very best remedy made for indigestion and dyspepsia. Indigestion, flatulence and the other ingredients they contain are endorsed by the entire medical profession. Nothing to the stomach, checking the stomach and digestive system, promoting the flow of the stomach juices, promoting regular bowel action. Bessal Dyspepsia Tablets help make your stomach feel good again and make it easy for you to eat anything you like.

There is no red tape about our offer. If they don't do just what you want, then just tell us so and we will give back your money just as cheerfully as we took it from you. They are sold only at the 2500 Health Stores, and in this town only at "Three Stars," 25c, 50c and \$1.00. A. Archibald, Druggist, 212 Jasper East.

Furniture Covers and Curtain Materials to Welcome the Spring

Spring is abroad—It's warm breath is in the air. The bright sunbeams that flood our homes with their cheery messages of new life make many of us look with rueful eyes at the shabby curtains and worn furniture covers—turning our thoughts to fresh new changes and to the immediate need. To help you in your selection of new curtains and drape fabrics Ramsey's suggest the following for your consideration:

For the dainty drawing room we have Swedish and Taffetas fabrics in beautiful shadow effects, French weath and festoon patterns, soft shades of rose, pink and blue; 32 inches wide, regular 35c and 50c. Now selling at **25c**

JAMES RAMSEY LIMITED

Phone Private Exchange 1195
ENTRANCES ON FIRST, HOWARD AND ELIZABETH STREETS.

Lovera Havana Cigars in a Sensational Sale, 6 for 25c Box of 50 for \$1.95

Never before in the history of Edmonton has it been possible to buy Havana Cigars for so little money. And this is a well-known brand, too. Right at the start we want to tell you that you have Ramsey's guarantee behind these goods. Try them, and if they should not satisfy your palate you may return them and with no questions asked we'll refund your money for all that you return. But you WILL like them, for they are fine cigars. Guaranteed pure Havana filler and Havana wrapper. Rich, aromatic tobaccos, made into nice, even, free smoking cigars (union made.) They are in a popular straight shape, 4 1/2 inch size.

Here is the Reason for the Wonderful Bargain Price

The famous Lovera cigars that sell 2 for 25c and 3 for 50c are, of course, hand made. In the making of cigars, the filler is worked dry. The brittleness of the leaves results in many small pieces breaking off. These short pieces accumulate and as hand work cannot produce as firm and even a cigar out of the short pieces as out of entire leaves the "shorts" are worked up in a mould. These mould cigars, however, cannot sell for the same price as the hand made goods. The result is a lower price—a 3 for 25c cigar.

But We Offer Them Wednesday 6 for 25c

We can do this because the manufacturers were overstocked and anxious to sell. To have them accept our offer we purchased a tremendous quantity, so large a quantity as no other western store would dare to take a chance on. We know, however, that we can sell them because the cigar is good and the value wonderful. Every cigar is a pleasant, delightful, aromatic, free smoke—so come on now and get a supply at this wonderful price, 6 for 25c, or box of 50 for \$1.95.

Women's Queen Quality Oxfords and Pumps Still Selling at \$2.95

The original quantity was so large that although we have sold a very large number the assortment is still good. This is probably the best value we shall be able to give you all season in Oxfords and Pumps—there is no question but that it is the best we have ever been able to offer so far. The leathers are patent, dull kid, tan calf, all sizes and gunmetal—every pair a stylish 1914 last and every pair fully guaranteed. All kids from 2 to 8 and all widths up to E. Regularly you'd have to pay \$5.00 and \$6.00 per pair. Here they are now at **\$2.95**

Men's \$2.25 Pants at \$1.50

Only 150 pairs of these pants and if you'd know how good they are they'd be sold first thing in the morning. They are mostly dark striped worsteds in several patterns. Sizes 32 to 42. Sale Price on Wednesday, per pair **\$1.50**

Men's Workshirts at 25c

The values are 50c and 75c so you can understand that you'll have to come early for them. There are 300 in the lot—Oxfords and Drills, plain and striped. Collar attached. Only two to each customer, while they last, each **25c**

Men's Sox Special at 25c

They are mostly 50c Sox—comprising the odd and broken lines of a wholesaler that we took at a worth while price concession. Lises and cashmeres, plain black, white, tan, cream, grey, etc., also fancy patterns. Per pair **25c**

Men's Underwear at 50c

These are surprisingly good underwear for the price. Shirts and drawers of medium weight cotton, natural, brown and blue and shades. Are comfortable and will give satisfactory wear. A Ramsey value, the garment **50c**

\$2 Leather Handbags \$1

They are solid leather handbags, some leather lined, some more lined. Owing to their being slightly dusty and perhaps rubbed quite a large lot will be cleared Wednesday at, each **\$1.00**

A Characteristic Ramsey Sale of About 50 Women's Spring Suits

Most of them are \$18.00, \$20.00 and \$22.00 Suits, while a few are regular \$24.00 values. All reduced for this day to **\$16.50**

On Wednesday 50 women may have the good fortune of getting suits of marked superiority and distinctive charm for less than the regular prices. This is the ready-to-wear department's offering to make Wednesday a big, busy day. Included are rich novelty suits of ratines, brocades, worsteds and tweeds. A great diversity of fashionable models—every one a worthwhile special.

\$16.50 is also the price on a lot of Misses' Tailored Suits. They are of pure wool navy serge, lined with silk serge and trimmed with buttons and white braids. They are neat, serviceable and excellently tailored.

Pretty Wash Dresses at \$3.95

When such pretty dresses are offered at \$3.95 every woman and miss should be well supplied. The lot is comprised of eight different designs, every one a dainty summer style. Made of Bedford Cord in plain shades and two-tone effects—trimmed with rathie collar and cuffs or dainty laces. Pretty dresses of excellent value. Each **\$3.95**

Real Bargains in Women's Hose

There are two big bargain lots—one consists of mill seconds of cotton hose, women's and misses' sizes. Regularly they'll sell at 25c—owing to their being seconds the price is 2 pairs for **25c**

Men Are Urged to See the Soft Felt Hats We're Selling at \$1.00

WELL KNOWN MINERS TO VISIT ONEMICA ON EXPLORATION TRIP

At last that great portion of British Columbia, lying north of the line of the Grand Trunk Pacific, called the Onemica country, and known to contain rich minerals, for it is the heart of what has long been known to be a country of great possibilities in the matter of minerals. The reason for its not having been explored to any great extent before this was the fact of the lack of facilities for getting into the country with any degree of ease whatsoever, but with the arrival of the steel into the wonderful resources of the country will soon be made known.

An expedition of experienced mining men are now making arrangements to enter the north of prospecting and exploring for all possible signs of

Proof of Value

of the time-tested, world-tried, home remedy—proof of its power to relieve quickly, safely, surely, the headaches, the sour taste, the poor spirits and the Biliousness—will be found in every dose of

BEECHAM'S PILLS

Sold everywhere, in boxes, 25 cents.

O'Neil was for two years engaged with Dr. Dooling, U.S.A., 8-10, P.M.S.; the well-known geological and mining expert, and with him explored the vast coalfields of the Kootenay country.

With him will be Harry E. Reid, a prominent mining engineer from Mexico. W. P. O'Neil, a man of much experience at mining in California and Nevada, and Morgan C. Mills, an old timer at the mining game, having been one of the original discoverers of the gold in northern Ontario, and one of the first locators in the Porcupine district and the Cobalt region in northern Ontario.

The party will leave Pocatello about the middle of April, and intend to be on the scene of operations as soon as the ice in the rivers breaks up. They will travel by canoe up the Fraser river as far as the Glenora portage and continue their northward route via the Crooked and Parsely rivers. They

will prospect along the mouth of the Wilby river, and also examine the gold and copper deposits in Deane's Canyon, where the recent copper strike has been made. Through Hogan's Pass and into the Tachia Lake district they will proceed, and examine the numerous areas of coal in that district. Regularly they'll sell at 25c—owing to their being seconds the price is 2 pairs for **\$1.00**

DR. DOVAN'S FEMALE PILLS

DR. DOVAN'S FEMALE PILLS are the most reliable and most effective medicine for all female ailments. They are sold everywhere, in boxes, 25 cents.

THREE STORY BLOCK WILL BE ERECTED ON WEST SIDE NAMAYO

According to a statement made by John C. McDonald, the firm of McDonald and Secord will begin the building immediately of a three-story brick building to cost \$50,000. This building will be situated on the west side of Namayo in the first block north of Jasper. The original plans of Macdonald and Secord for a two-story black have been altered and it is proposed to have under the new plans a frontage of 24 feet on Namayo avenue a depth of 100 feet with a width of 24 feet at the rear. The upper floors will be laid out in apartments and the ground floor for offices.

St. Louis may soon spend \$60,000 for a new city morgue.

Flies Over Mountains.

Caracas, Venezuela, 14.—An American aviator, Cecil Peel, yesterday made the first flight from Caracas to the mountains. He landed safely at LaGuaira.

Burns

The fire is removed from burns and acids and the intense pain is quickly relieved by this ointment. It is a sure cure for all burns, scalds, and sores. It is sold everywhere, in boxes, 25 cents.

Dr. Thomas' Eclectic Oil

Sold everywhere, in bottles, 25 cents.

MANY CLAIMANTS FOR MIDDLEWEIGHT CHAMPIONSHIP—WHO'S YOUR CHOICE?

Since Death of Stanley Ketchel Many Claims Have Been Made to Coveted Honors—Clabby, McGorty, Klaus, Murry and Others in the Linelight.

Who has the proper claim to the title of middle weight champion? This is a question that has been under discussion since the death of Stanley Ketchel, the unbeaten champion, but the prospects for early decision are much clearer today than they have been in some time. Eddie McGorty's reversal of form in Australia, in which he scored a ringing win over the "Dave" Smith, has tended to clear up the middle weight horizon, since it has eliminated the foreigners from further consideration.

Despite the contention of many managers, who have kept the question open, for business purposes, it has received itself into a proposition in which it may be said that only five men have without the aid of trickery are today legitimate claimants to the coveted honors.

Many Boxers of Ability
Clabby, the San Francisco whizzer, Eddie McGorty, the Wisconsin wizard, and conqueror of Klaus and Smith; George Chip, the fast fighting Philadelphian wonder, and Mike Gibbons, the St. Paul stamper, all of these men along with Jack Dillon, who, because of his extra weight has since graduated out of the class with Billy Murray, the latest find of the coast fans, who scored a knockout of Leo Houck, are to be taken under consideration when the question of the legitimate claimant to the middle weight is decided. The first five may be said to

ALASKA DOG RACE NOW IN PROGRESS

"Scotty" Allan's Team Lead for First 32 Miles of Race—Hundreds See Start.

Nome, Alaska, April 14.—The all-Alaska sweepstakes dog race, 412 miles over the wind-swept snow trail from Nome to Kodiak and return, was begun at nine a.m. yesterday. All the inhabitants of Nome turned out to see the teams start. A blizzard was in progress and light snow fell. Four teams are in the race, those of John Johnson, 18 dogs, driven by himself; Fred Ayer, 14 dogs, driven by himself; Leon Seppala, 14 dogs, driven by himself; and Allan and Darling's 16 dogs, owned by A. A. (Scotty) Allan of Berkeley, Calif., and driven by Allan. Johnson holds the record for the course, Allan has won the race twice and Ayer won the sixty-four mile Nome Derby last month. The sweepstakes winner gets \$2,000 and a trophy cup.

Mike Gibbons Another
The Wisconsin boy, it must be admitted, is a fighter, but he is somewhat of a fighter. His wrestling of Frank Klaus, the self-proclaimed champion, is a thing that has not been forgotten by the fans, while his showing against Pat Bradley, Bellingham, B.C., cannot be said to be anything that he would be proud of, nevertheless he did not suffer defeat. His only loss, the only one that may be said to reflect against his glory was the decision rendered against him in the Clabby encounter.

His decisive win over Smith in Australia, if we are to believe the reports of the latters, shows that he required some of his lost aggressiveness and boasts his stock for the major honors. George Chip, the Pittsburgh hope, upon whom all broke-even folks are willing to wage their bankrolls if given a chance with any of the legitimate claimants to the title, made vacant by the death of Ketchel.

George Chip Is Good
A cool, deliberate fighter who weighs every blow before he decides to start anything and with a head for ring generalship that is second to no man in the ring. Chip is an opponent that is sure to cause trouble at any stage of an encounter.

In a double win over Klaus, in which battles he outthrust and out-fought the former champion, stamps him as a boy with all the ear marks of a title holder. He is a little heavier than the rest of the boys and this along with his tremendous strength of arms will tell in a long fight. It is to be hoped that he will be favored in the near future with the opportunity of demonstrating some of his real ability on some of the near champs that make so much noise when their names are left out of the story. A clash with McGorty, Clabby or Murray, would be watched with a great amount of interest.

Boxing in Australia.
Sydney, N. R. W., April 14.—Jeff Smith, the American pugilist, easily outpointed Pat Bradley of Australia at the stadium yesterday, Bradley being so badly punished that the fellow stopped the bout in the sixteenth round.

Sweden in 1913 imported \$624,002 worth of autos.

Our National Game

There is one thing certain, that both amateur and professional lacrosse is in for a big season. The enthusiasm displayed around the country should make 1924 a banner year for the lacrosse game.

The Maitlands of Toronto will have teams in the senior and junior series of the O.A.L.A., and three teams in the Toronto Lacrosse League.

Peterborough will be back in lacrosse this summer, and will have a team in the O.A.L.A. intermediate series, besides conducting a school league with six teams.

Attempts have been made in New Westminster to revive several promising amateur lacrosse stars to make the jump to the pro class, but this has been slipped in the bud, the employers of two of these players, last week, giving the boys strict notice that their jobs will not hold should they decide to flop.

The annual meeting of the "Big Four" will likely be held in Montreal on Saturday, April 25. The applications of new clubs will be considered, but the schedule will not be drawn up until President Quinn returns from England.

KILLIFER EXPELLED FROM FRATERNITY: MAGNATES BLAMED

New York, April 14.—William Killifer, Jr., catcher of the Philadelphia National League club was expelled from membership in the Baseball Players Fraternity yesterday for "contract jumping." This action the fraternity took in conformity with a decision reached at its annual meeting last October prohibiting breaches of contract.

In announcing Killifer's expulsion, David I. Fultz alluded to "cut throat tactics" of baseball club owners in inducing players to violate agreements. The magnates, more than Killifer, were blamed for his jumping to the Phillies. Killifer is now back with Philadelphia and the United States court has held that he is the property of that club.

MAKES WORLD'S BOWLING RECORD

Rochester Team Total 3,035—Sutton Averages 214 and Totals 1,642.

Atlantic City, N. J., April 14.—The Genesee team of Rochester last night established a new world's tournament mark for five men teams at the National Bowling association, by rolling an aggregate of 3,035, 33 pins over the former record made by the Grand Central of Rochester, at Patterson, N. J., two years ago. Captain Sutton was high man of the quintette with 642, an average of 214. The New Yorkers did not put up an especially brilliant individual game but each member played consistently.

The Waldenman-Brew team, Cleveland, rolled into second place with 2,536, and the First Chasins, Harrisburg, fifth with 2,505.

BILLY RYLE WINS FIRST BLOCK IN 18.2 BILLIARD MATCH: 250-124

Second Block Will Be Played Tonight at Reno Billiard Hall—Ryle Has Good Lead on Sutton and Displayed Much Class in Last Night's Game.

Billy Ryle won the opening block of the 18.2 ball line billiard match against H. Sutton at the Empire Billiard Parlor last night.

This was the first ball line billiards ever played here and it was witnessed by a large audience, every reserved seat being taken long before the game was called and the large hall was crowded with onlookers who were compelled to stand.

The game was slow to get going as the balls were new and neither player was accustomed to them, and not until the latter part of the game did they get going properly and then Ryle showed some classy billiards.

Ryle won the bank and failed to score. Sutton scored three and nursed. Nothing more was doing in the scoring until the fifth and sixth innings when Ryle scored 10 and 20 points respectively, and in the eighth inning, Ryle had his handicap made up when he scored a run of nine, and from then on, Ryle gained at every inning, and for his last nine innings, he averaged 14, which is very fast billiards.

Sutton could not get his stroke and the balls would not break for him. His best were 13 and 14, while Ryle's
